

OVERVIEW

- Cardinal Equity Partners is an investment firm that has been purchasing and growing businesses since the early 90's.
- As a private family-funded firm, we are not constrained by traditional private equity limitations relating to deal structures or holding periods.
- Our mission is to own a select number of high quality businesses and to partner with management teams to build value over the long term.
- Focus on consumer-oriented businesses, products or services.

OUR INVESTMENT PHILOSOPHY

- We believe that successful investments begin with solid companies possessing positive track records and strong management teams. We then look to add value through our financial resources and operating expertise. While we do not participate in daily management, we function as active advisors, serving as a resource for management teams as they grow their businesses.
- We maintain a commitment to preserve the legacy of the companies in which we invest, recognizing that culture is a key determinant of long term success.
- We strive for complete alignment of interest with key management team members through incentive structures that reward short and long term performance.
- While debt is employed to enhance returns, leverage is kept to modest levels in order to insure that each business has a balance sheet that can support its growth plans while providing protection in the case of economic downturns.

INVESTMENT CRITERIA

Target Sectors:	Consumer products, niche manufacturing, value-added distribution, and business services.
Situations:	Recapitalizations, succession planning, family legacy transitions, spin-offs.
Company Size:	\$1 million to \$10 million of EBITDA for platform transactions, no minimum for add-ons.
